# Program Overview

There is so much talk about Leadership and the qualities of a good leader. But you ask any leader what makes them a good leader and you may not get a direct answer. That's because leadership is a combination of traits, and the meaning of true leadership differs across a variety of environments, factors and dimensions. A good leader adapts their style to suit the environment, and engages and inspires others to work to their best capacity.

That's why this program is the first of its kind to link leadership qualities to team building. A true leader builds its teams to lead from within. This program offers you advanced development in the twin capability of leading people and teams. It allows you to examine your style both as a group leader and a group builder, and emerge a hero for any Organisation.

It recognizes that no one can lead without the key leadership tools that we will develop in you over the 2 day program; and it allows you to examine your team approach from a generational perspective, as you further discover that situational leadership is more relevant than ever before when managing across generations.
