

# HONEYLIGHT RISK MANAGEMENT TRAINING ©

## Key Outcomes/benefits

Every manager manages risk at some level.

This program helps you develop and evaluate a risk management plan for the organisation as part of its strategic plan. It incorporates an assessment of potential risks facing the organisation and the development of plans to mitigate risk situations through elimination, isolation and protection.

## Key Topics

- Understand the application of the 4 stage risk model
- Identify and analyse risk and assess appropriate treatments
- Understand the importance to the organisation of developing a risk management plan which incorporates the policies and procedures for managing risk
- Linking risk to safety
- Risk Compliance matters
- Identify and analyse risk, and select appropriate treatments
- Implement, evaluate, monitor the risk management plan.
- introduction and overview of risk management
- Develop policies & procedures for effective risk management
- Develop a risk register
- methods for implementing and monitoring and improving the risk management plan
- conduct a risk analysis by drawing up a risk profile and using a risk matrix

## Duration and format

2 days in duration, this highly participative workshop style program blends a variety of different methods, including presentations, facilitated group discussion, live examples from your company, project team work groups, exercises and case examples. The format allows participants to openly discuss issues from within their own organisation and benefit from the collective experience of participants and presenter.

## What's Included?

- Templates and models for immediate application
- a copy of Australian Risk standard an interactive workbook, with summaries of key concepts and skills
- a quick-reference card on critical risk principles/ tools
